Professional Summary

Flutter Developer with 2+ years of experience building and maintaining cross-platform mobile and web applications using Flutter and Dart. Experienced in REST API integration, state management, reusable UI components, application architecture, and AI chatbot development. Strong problem-solving skills with a focus on Clean Code, SOLID principles, and building maintainable, reliable software. Passionate about continuous learning, improving technical and soft skills, and contributing to high-quality software products.

Work Experience

SEN:BOX Framework – Ho Chi Minh City, Vietnam — Dec 2025 – Present

Mobile Developer – Project: SENBOX Mobile App — *Team Size: 12*

- Architected, developed, and maintained core features for the SENBOX mobile application across iOS and Android, delivering responsive UI and scalable architecture.
- Collaborated directly with Project Managers, Technical Leaders, and cross-functional Web/Backend teams to propose product initiatives, refine requirements, and design API contracts.
- Optimized multimedia delivery, asset compression, and caching strategies, slashing Cloud Front image and video operational costs by over 50% (more than a 2x cost reduction).
- Authored and customized native plugins (Android & iOS) via Platform Channels to fulfill company-specific business and functional requirements.
- **Technologies:** Flutter (BLoC), Kotlin, Swift, Clean Architecture, Drift (SQLite ORM), Firebase (Crashlytics, Analytics, Remote Config), WorkManager, Isolate, Slang (i18n), MediaKit, FVM, Mason CLI.
- **Links:** Google Play App Store

NTSoft – Vinh Long, Vietnam — Aug 2024 – Oct 2025

Mobile Developer – Governmental Digital Solutions

Project: Food Safety (ATTP Hau Giang) — *Team Size: 15*

- Developed citizen reporting with Google Maps API, administrative inspection management, and optimized SQL Server stored procedures (reducing latency from 5s to 2s).
- Built and published the "ATTP Hâu Giang" mobile app on both Google Play and App Store.
- **Technologies:** Flutter (GetX), SQL Server, Google Maps API, CI/CD.
- **Links:** Google Play App Store

Project: Digital Land Price Map (Ban Do Gia Dat) — *Team Size: 15*

- Developed cross-platform mobile features using Flutter (GetX) for land price lookups, parcel boundary display via Google Maps API, and statistical price trend charts with fl_chart.
- Connected RESTful APIs with local caching (SQLite) and search filtering for fast retrieval of land adjustment tables and legal appraisal files.
- **Technologies:** Flutter (GetX), Google Maps API, SQLite, RESTful APIs.

Project: Labor Market Management (NTSOFT TTLD) — *Team Size: 15*

- Developed mobile survey forms with input validation and offline SQLite storage, enabling field officers to digitize labor and employment profiles without network dependency.
- Integrated labor supply-demand matching modules connecting job seekers with recruiting enterprises; published the app on Google Play.
- **Technologies:** React Native (Tanstack), SQLite, RESTful APIs, Offline Sync.
- **Link:** Google Play

Satek Solution – Can Tho, Vietnam — Apr 2024 – Jul 2024

Frontend Developer / Intern – Project: Trung Muoi Quoc Viet — *Team Size: 10*

- Started as a Manual Tester for Next.js web application and React Native mobile application, and was subsequently entrusted by the Project Manager with full responsibility for frontend development.
- Developed the entire frontend for the "Trung Muoi Quoc Viet" website using Next.js, working closely with the backend team and PM throughout the project lifecycle.
- Built responsive user interfaces and integrated RESTful APIs using modern web technologies.
- **Technologies:** React (Next.js), Axios, MySQL.
- **Link:** trungmuoiquocviet.com

Personal Projects

› Self Manager AI — Sep 2025 – Nov 2025

Freelance Project (Vlance) – Mobile Developer

- Engineered a personal task-management and user-journaling application integrating AI-powered conversations within a single unified platform.
- Built comprehensive to-do management, quick journaling features, and an analytical overview dashboard.
- Integrated multilingual AI supporting conversational interactions with previous-message memory, multi-language vocabulary lookup, and smart content suggestions.
- Designed a modern UI with three dynamic themes (morning, afternoon, evening) to enhance user experience, accompanied by automated notifications and reminders.
- **Technologies:** Flutter (Riverpod), Freezed, SQLite, Gemini API, GitHub Actions (CI/CD).
- **Link:** Google Play

› Daily Motivation — Aug 2025 – Oct 2025

Personal Project – Mobile Developer

- Designed and built a mobile application providing users with fresh daily motivational quotes and positive affirmations.
- Developed an Android Native home screen widget for quick access, enabling users to stay motivated without opening the application.
- Engineered seamless quote export and media sharing optimized with FFmpeg, allowing users to share positivity in one tap.
- Crafted a minimalist interface with complete Light/Dark Mode support, ensuring a distraction-free and visually comfortable experience.
- **Technologies:** Flutter (Riverpod), NestJS, PostgreSQL (Supabase), GitHub Actions (CI/CD), FFmpeg.
- **Link:** Google Play

› LADB Remover — Jun 2026 – Aug 2026

Personal Project – Mobile Developer (Flutter & Android Native)

- Developed an Android utility application enabling users to safely uninstall and restore pre-installed system applications without requiring root access or a PC.
- Integrated Wireless Debugging to manage application packages and inspect installed software directly on the device.
- Implemented backup and restore tracking to help users safely manage application states and prevent unintended system issues.
- Designed an intuitive user interface with step-by-step guidance for seamless connection and package management.
- **Technologies:** Flutter(Provider), Kotlin, Hive.
- **Link:** GitHub (App Remover LADB)

Education

› Can Tho University — Oct 2020 – May 2024

Bachelor of Science in Information Systems – GPA: 3.4 / 4.0 — *Can Tho, Vietnam*

- **Graduation Thesis:** "Music Emotion Analysis Using Deep Learning Techniques" – Graded: **9.5 / 10**.

Certificates & Languages

Certificates: Software Architecture — Coursera
Languages: English (Working Proficiency)

Technical Skills

Programming Languages: Dart, Kotlin, Swift
Mobile Development: Flutter, React Native (Expo),
State Management: GetX, BLoC, Riverpod
Architecture & Principles: Clean Architecture, MVVM, MVC, SOLID Principles
Databases & Backend Services: SQL Server, PostgreSQL, MySQL, SQLite (Drift ORM), Firebase
DevOps & Development Tools: Git, GitHub Actions (CI/CD), Fastlane, SVN, FVM, Mason CLI, Postman, Figma
AI Integration: Gemini API, GPT for Slang i18n
Soft Skills: Problem Solving, Team Collaboration, Prompt Design
